Apprentice Engineering for GRADES 2-5

Wednesdays 12:40-2:10

Winter Session: Environmental and Marine Engineering

1/18/17 to 3/15/17 — \$210 (9 weeks)

Register by December 23 and get \$10 off

One program, two exciting topics! Students explore basic solutions to alternative energy and environmental issues, from crafting efficient wind-powered machines, designing their own water filtration system and using minimal resources to design effective solutions to reduce and contain man-made disasters such as oil spills. Students also design, create and test several types of marine based devices and vehicles. The construction of working prototypes will teach and reinforce the concepts of above water transportation, underwater exploration, and harnessing the power of water.

Engineering For Kids offers the best in STEM enrichment for children ages 4-14. All of our programs are dedicated to teaching conceptual, lifelong learning through fun, hands-on activities. Our curriculum is developed by a team of professionals to meet national standards in STEM education.
